

## **GOD'S -YHWH'S CALENDAR IN THE SKY**

**“In the beginning God created the heaven and the earth. And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters. And God said, Let there be light:and there was light. And God saw the light, that it was good: and God divided the light from the darkness. And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day.” Genesis 1:1 -5. In this text of scripture, we see that time began 4000 years B.C., and that on the first day of creation, the heaven, the earth, the light, and the day and the night were created. “My covenant will I not break, nor alter the thing that is gone out of my lips.” Psalms 89:34.**

**“Thus saith the Lord, which giveth the sun for a light by day, and the ordinances of the moon and of the stars for a light by night, which divideth the sea when the waves thereof roar; The Lord of hosts is his name: If those ordinances depart from before me, saith the Lord, then the seed of Israel also shall cease from being a nation before me for ever.” Jeremiah 31:35, 36. Thus God-(YHWH) has given us a calendar that cannot be altered, broken, nor destroyed, for our Father stationed it in the heaven-sky, beyond man’s reach.**

**We know that it takes four things to make a calendar (1) a day; (2) a month; (3) seasons; (4) a year. The earth’s rotation on its axis makes a day. The moon orbiting around the earth makes a month. Three orbits of the moon around the earth make a season. The earth’s complete orbit around the sun makes a year. Thus God’s world calendar called Creation Calendar is both solar and lunar.**

**When we look at March 16-17 on Creation Calendar, we will see the words New Year’s Day, Spring Begins or Vernal Equinox, and we will find that March 16-17 is the beginning of the 1st Solar Month, as shown near the top of the month of March; all of these descriptions automatically refer to March 16-17 as the beginning of solar year. The law of nature automatically marks off the twelve month intervals, called solar months. Since Spring is the first season Of the year beginning on March 16-17, it becomes the proof that March 16-17 is the beginning of the solar year, instead of January 1, according to the law of nature. Each of the solar months begin on the 16-17th day of each Gregorian month, the number and name changing with every new month. Also, when we see the word New Moon on the month of March, we must realize that it is the first lunar month of the year; the New Moon automatically marks off the lunar months. Thus with each orbit of the moon around the earth, the number and name of the lunar month changes. By this system of nature’s calibration, we are kept in harmony with nature.**

**In the book of Genesis chapters one and two, we find the story of the week of creation called the fourth commandment, which shows that YHWH, the mighty God, took six days to create the heaven and the earth, sun, moon, stars, light, air, water, animals, the fowl, vegetation and plant life, etc., and He rested on the seventh day, by which He established the weekly cycle for mankind to follow throughout eternity. See Exodus 20:8-11. “He appointed the moon for seasons: the sun knoweth his going down.” Psalms 104:19. Let it be known that Creation Calendar follows these laws. Are there not four seasons in the year? Thus you can see that Creation Calendar was formulated from God’s created laws of nature.**
