

## HIGHLIGHTS

As the ages rolled by men became concerned about the accuracy of time and its beginning, therefore some men **turned** their attention to the research of time and different epoxies were chosen, by which to establish the beginning of time. It was determined that there was a four year discrepancy in the B.C. period, by a Catholic monk. Not wanting to disturb the then present time method of counting, the monk decided to add the four years to the beginning of creation. Thus you will find the year 4004 B.C. at the top of the center reference of the Bible. This of course is wrong according to Biblical prophesy and astronomical law.

My research led me to realize that there was a loss of four years at the time of Christ's birth, and that this time needed to be dealt with. In doing so it was shown that there was only 4000 years from creation to the birth of Christ, instead of the 4004 as claimed. The four years unaccounted for involved Christ's need to escape the **death decree** that King Herod made to destroy all male children to the age of two years old, hoping to destroy the Father's son—(Yahshua). This effort was prevented by the Father-(YHWH), for he send a message to Joseph by an angel in a dream, saying to take the young child and his mother and flee into Egypt until the **death** of King Herod. By doing this Christ was lost sight of, and his identity forgotten during the years they were in Egypt and in Nazareth. At the time that Christ's **identity** was finally made known, it was determined that Yahshua was born four years before they started counting time in A.D. But the calendar was never updated to reflect the **lost four years**. This is why I updated Creation Calendar to show the lost four years in adding them in the year 2000, which put the calendar in harmony with the law of nature, called astronomical law. You will see this as you look at the calendar today that you hold in your hands.
