

HOW TO FOLLOW CREATION CALENDAR

In order to follow CREATION CALENDAR it is necessary to understand that it is both a Solar and Lunar Calendar, and is regulated by astronomical laws. This makes CREATION CALENDAR of utmost value in understanding times and prophecies in the Scriptures. Since the Solar, Lunar, and Gregorian years each have different beginnings, it is necessary to point out each of these years by a row of Biblical Solar months and days; by a row of Biblical Lunar months and days; and by a row of Gregorian months and days. If you will study the example below, you will have no trouble understanding and following CREATION CALENDAR.

The Biblical Solar year begins on March 16-17, or the Vernal Equinox. The Lunar year begins with New Moon closest to (on, before, or after) the Vernal Equinox. The New Moon Sabbath, IS the beginning of each Biblical Lunar month. Each New Moon Sabbath, Seventh-Day Sabbath, The Lord's Supper on Abib 15, The seven days of Unleavened Bread goes to Abib 21, Pentecost, Day of Atonement on Tishri 10, Feast of Tabernacles starting on Tishri 15, and Solemn Assembly on Tishri 22 are all Holy Convocations. And they are 24 hour periods beginning and ending at sunset (Lev. 23: 32), in which no servile work is to be done (see also Isaiah 58:13), for they are Sabbaths of the Lord—statutes forever. Our aim is to make CREATION CALENDAR available to you through your Christian Bookstore, or by direct mail. Please write to the address on this calendar for more information.

CREATION CALENDAR MARCH						
ASTRONOMICAL YEAR 2012			GREGORIAN YEAR 2008		ABIB 1ST LUNAR MONTH
